# Subject index

Adsorption, 37
Albumin ultrafiltration, 71
Alkali metal cation transport, 175
γ-Alumina membrane, 167
Amino acid transport, 175
Anion exchange membranes, 99

Backflushing, 145

Ceramic membranes, 127, 139, 145
Ceramic or composite membranes, 155
Chemical surface modification, 231
Comparison of native and immobilized lipase on hollow-fiber membrane, 209
Composite membrane, 91
Composite membranes, 127, 231
Concentration polarization, 83, 215
Concentration profile, 185
Configurational number, 1
Contact angle, 37, 283
Cross-flow, 185
Crownophanes, 175

Design, 109

Economics, 53, 109
Electrotransport, 99
Ethanol diafiltration, 71

Fiber membranes, 251
Flux enhancement, 231
Fouling, 127, 283

Gas diffusion, 199
Gas permeability, 275
Gas permeation, 139, 145
Gas permselectivity, 275
Gas separation, 199, 275
Geometric factor, 139

Humic substances, 37
Hydrocolloid, 27
Hydrogen, 91, 199

Irreversible thermodynamics, 83

Limiting flux, 185
Lipase immobilization, 209
Liquid membranes, 175, 251
Liquid permeability and separations, 263

Mass transfer, 27
Mass transport, 155
Mean pore radius, 139
Membrane bioreactor, 13
Membrane distillation, 1
Membrane selection, 13
Metal–alkoxide, 91
Metal-dispersed microporous membrane, 199
Microfiltration, 127, 263
Microporous and porous membranes, 251, 263
Mobility, 99
Modeling, 215
Modelling, 83
Modules, 53, 109, 251

Nanofiltration, 155, 167
Numerical technique, 185

Optimization, 109

Pervaporation, 53, 109
Poly(ethylene glycol), 155
Polymeric membranes, 209
Pore radius, 145
Prediction, 185
Pressure profile, 145
Process optimization, 71
Protein transmission, 83

Radioactive wastes, 251
Reverse osmosis, 231
Rotating membrane filter, 263

Selective permeation, 199
Silyl-substituted PPO, 275
Skin, 231
Sol–gel technique, 199

Spillover, 199
Streaming potential, 37
Sulphuric acid, 99
Surfactant-induced breakthrough, 13
Swelling, 27

Taylor vortex, 263
Theory, 215
Thermochemical water decomposition, 91
Transport mode, 1
Transport number, 99
Two-phase biocatalysis, 13

Ultrafiltration, 83, 215, 283

Volatile organic compounds, 53, 109
Vortex flow configurations, 83

Water treatment, 53, 109
Water vapour, 27
Wound dressing, 27

X-ray photoelectron spectroscopy, 37

Zirconia–silica, 91
